

PROJECT ABSTRACT:

The project is designed to direct the attention of a restaurant server towards their customers.

The unit unfolds to a max. of 60 degrees to enable it to sit in a stable position on top of a flat surface.

The unit would be powered by 3 volt flat batteries.

The unit is activated by the touch of a button.

When activated, the unit will illuminate by a series flashing bulbs. The unit is turned off with the same on/off button.
